

Atlantic Pump & Engineering, Inc.

Times Volume 2

Hello again! We have a great new product that we are extremely excited to tell you about. ITT Monitoring and Control, a division of ITT is offering ProSmart Predictive Condition Monitoring.

With this product you will hold a **key to **improving** your plants **profitability**!**

ProSmart's sensors and features work to collect all sorts of data from any of your rotating equipment. You can pick all the features, alerts, times, schedules you want to help monitor your equipment. The system monitors everything every 5 seconds and will alert you by computer, cell phone, palm pilot, etc., when things start to change.

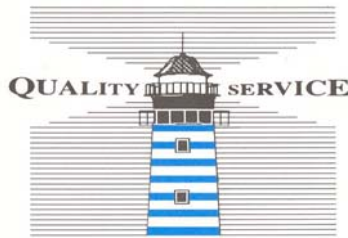

By alerting you with potential problems before they happen ITT Monitoring and Controls goals are to: **eliminate unplanned downtime, reduce maintenance costs, reduce energy costs, and overall improve plant reliability!**

Plus, for stressed out supervisors you can finally find time to take that tropical vacation and not have to worry about your plant while you're gone! You can just hop online and check the reports and statistics yourself and wash any doubts away.

Just click [HERE](#) or visit (http://www.ittmc.com/ProSmart_Video_English.html) and see for yourself how ProSmart Predictive Monitoring changed this mans life!

And be sure to visit www.ittmc.com for more valuable information about this great product!
